

DUKUNG

USB MODEM DOCKING STATION

HSDPA+HSUPA USB Modem

Plug n Play

E220 Compatible

Multiple Colors

Applications

Dukung is a HSDPA or HSUPA (HSxPA) USB Modem docking station. It converts HSxPA USB Modems into a full featured WiFi Router.

It converts single user USB modem into a multiple users ready WiFi Router, reducing the cost for broadband Internet connection.

It can be used as a portable WiFi hotspot solution e.g. off-site meetings, conferences, trade shows, etc.

CEEDTec **Dukung** is the first WiFi Router developed to support HSDPA (3.5G) USB Modem connection. On the LAN side, it supports both the wireless WiFi 802.11b/g and Ethernet 10/100 Mbps interfaces.

Dukung offers a true plug and play, instantaneous wireless solution. Fixed line or DSL cable connection is NOT needed - just insert the USB Modem to create an instant hotspot.

USB Modem Models Supported :

- Huawei E220 HSDPA USB Modem
- VigSys VM10 HSDPA USB Modem
- Huawei E270 HSPA USB Modem*

Customization & Re-branding support available for packaging, language, and software settings. ODM and OEM customers are welcome.

- * *firmware upgrade required*
- ⇒ *E220 and E270 are trademarks of Huawei*
- ⇒ *VM10 is trademark of VigSys*
