USB MODEM

CEEDTec Langsat HSDPA USB Modem provides mobile wireless broadband access over HSDPA (3.5G) connection with data rates up to 3.6Mbps or 7.2Mbps with firmware upgrade.

Langsat is a true plug and play mobile broadband solution; just insert a SIM card & connect Langsat to Laptops or PC USB ports for instant broadband access.

Langsat is designed with mobile users in mind. It is light weight and compact. Langsat will be powered solely thru USB interfaces. No external battery is required.

Customization & Re-branding support available for packaging, language, and software settings.
